PROFESSIONAL SUMMARY

Results-driven **Data Analyst & BI Developer** with a robust engineering foundation, specializing in translating complex operational data into strategic business insights. Expert in architecting end-to-end ETL pipelines, advanced SQL modeling, and interactive BI visualizations. Proven track record of automating workflows, scaling analytics for enterprise-level clients, and enabling data-driven decision-making across cross-functional teams.

EDUCATION

Mansoura University

Bachelor of Engineering in Telecommunications — Very Good with Honors

Egypt

Sep. 2020 – June 2025

EXPERIENCE

BI & Data Analyst

Grand Community (try-gc.com)

Feb 2026 – Present

Cairo, Egypt

- Engineered automated Python web scraping pipelines across 3+ social media platforms, eliminating 80% of manual data collection effort and freeing ~15 hrs/week for the Operations team.
- Built an influencer-matching analytics framework to profile and rank 85,000+ influencers against campaign criteria, enabling targeted outreach for enterprise clients including Starbucks, Domino's Pizza, and B. Laban.
- Optimized complex SQL workflows across 2 production databases (200+ tables, 6M+ rows), reducing ad-hoc querying bottlenecks and accelerating weekly data delivery cycles by over 60%.
- Designed recurring BI campaign performance reports surfacing marketing ROI trends for C-level stakeholders and tier-1 clients, enabling faster strategic pivots on live campaigns.

Freelance Data Analyst

Self-Employed

Jul 2025 – Feb 2026

Remote

- Increased identified retail sales opportunities by 15% by engineering 5+ SQL analytical data models and automated Power BI dashboards, replacing manual Excel processes with a scalable, self-service reporting solution.
- Delivered end-to-end analytics solutions across 3+ industry verticals, applying EDA and statistical modeling on datasets exceeding 50,000 rows to surface performance drivers and reduce client reporting turnaround by 40%.

PROJECTS

End-to-End Sales Data Warehouse & Analytics 🔄 | *SQL Server, Power BI, DAX*

Oct – Nov 2025

- Architected a Sales Data Warehouse using Medallion Architecture and Star Schema modeling, automating ETL pipelines for 10,000+ monthly records and cutting data redundancy by 25% via surrogate key implementation.
- Built multi-page Power BI dashboards with DAX measures and drill-through capabilities, enabling ad-hoc stakeholder Q&A and product-level analytics on the optimized Gold layer.

English Football Analytics Engine 🔄 | *Python, Pandas, Scikit-learn, Power BI*

Dec 2025 – Jan 2026

- Engineered a Python/BeautifulSoup web scraper to aggregate 2,000+ match records across 10 seasons with 98% data accuracy, applying Scikit-learn feature engineering to model league performance and referee behavior metrics.
- Designed a 12-page Power BI dashboard with DAX-driven drill-down visuals and cross-filter navigation, delivering stakeholder-ready analytical storytelling at scale.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, Bash Scripting

Data Processing & Analysis: EDA, Statistical Modeling, Feature Engineering, Scikit-learn

Data Visualization & BI: Power BI (DAX, Power Query), Tableau, Streamlit

Data Engineering & ETL: ETL Pipeline Design, Data Warehousing, Web Scraping, dbt, Apache Airflow

Cloud & Tools: Azure Data Factory, Docker, Git/Github, Linux, VS Code

CERTIFICATIONS

Advanced Google Data Analytics 🔄 | *Google / Coursera*

Associate Data Analyst 🔄 | *DataCamp*
